Dear Hiring Manager,

I am writing to express my interest in opportunities within your esteemed organisation, where I can leverage my expertise as a QA Automation Engineer. With over 5.6 years of experience in QA Engineering, including 2.6 years dedicated to automation testing, I have successfully contributed to diverse industries such as transportation and food delivery, ensuring high-quality software solutions. My role at Appscrip has honed my skills in leading testing efforts across multiple platforms, including iOS, Android, and web applications, while continuously enhancing automation frameworks for improved efficiency.

I am a certified ISTQB® Advanced Test Automation Engineer and have developed a comprehensive automation framework supporting over 2,000 test cases. My proficiency in modern testing methodologies, including BDD and Agile, combined with my experience in client-centric test coordination, has enabled me to manage testing for over 30 client applications effectively. I excel in collaborating with cross-functional teams to drive test automation strategies and streamline testing processes, contributing to overall project success.

My technical skills in Python, Selenium, and API testing, along with my experience in high-traffic domains, have equipped me to enhance application quality through AI-driven testing and optimised test coverage. I am passionate about delivering reliable and efficient software solutions that meet client-specific requirements and improve user experiences.

I am eager to bring my skills and experience to your team and contribute to your organisation's success. Thank you for considering my application.

Sincerely,

Sudeep Yadav
